

Resin

Product Description

Printed full colour resin panels that can be either translucent or opaque. The material has a highly scratch resistant and renewable surface and is ideal for feature walls, splashbacks and partitions.

Installation

This product must be installed by an experienced tradesman. Installers should be aware of the following:

- When adhering resin to a surface, we recommend the use of a double sided tape (3M Foam Tape)
- When joining panels on site, a neutral cure clear silicone is best.

bleux can arrange for installation and site measures in all capital cities if required.

Lead Time

Four weeks from receipt of 50% deposit and purchase order. Please allow longer for customised colours and designs.

Product Specifications:

- Resin panel is 6mm thick, other thicknesses available.
- Day to day cleaning is done by lightly wiping the panels with a damp, soft cloth or chamois.
- Do not use glass cleaning products, gritty abrasive scouring compounds or alkaline cleaners as this will damage the panels.
- Even if scratched, resin panels can be restored to their original condition. Minor scratches can be removed by rubbing the area on a random circular motion with a fine steel scouring pad.
- Final colours may vary to what is viewed "on screen". bleux will only guarantee colours once a printed sample is approved.
